

Afifa Ashraf

Frontend Developer

I am a passionate Frontend Developer skilled in HTML, CSS, Tailwind CSS, JavaScript, and React. I specialize in creating responsive, modern, and user-friendly websites with clean and engaging designs. I also have experience with Figma, Git, and GitHub for designing interfaces and managing projects efficiently. I enjoy building interactive web experiences and continuously learning new technologies to improve my development skills and create better digital solutions.

PROJECTS

Real Estate Website

frontend development

I developed a responsive Real Estate Website using HTML, CSS, Tailwind CSS, and JavaScript. The website features a modern and clean design for showcasing properties in an organized and user-friendly way. I focused on creating responsive layouts, attractive property sections, smooth navigation, and an engaging user experience. This project helped me improve my frontend development, UI design, and responsive web development skills.

2026

Portfolio Website

frontend development

I developed a modern and responsive Portfolio Website as a frontend project using HTML, CSS, and Tailwind CSS. The project showcases my skills, projects, and contact information with a clean and attractive user interface. It helped me improve my frontend development and responsive web design skills.
